

How to Measure for a Custom Shelf 2-LEG Vanity

Your Palmer Industries 2-Leg Vanity Leg System was manufactured to a size larger than you required in order to be cut to size in the field.

With the installation complete, Palmer will require accurate dimensions of the leg system in order to custom build the shelf to fit.

Please carefully measure your leg system and provide Palmer with dimensions “A” , “B” , “C” , and “D” as shown below. Provide dimensions to the nearest 1/16” and double-check all measurements.
